GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

The Group generally allows an average credit period range from 30 to 120 days to its customers. Receivables that were neither past due nor impaired are related to customers for whom there was no default. Receivables that were past due but not impaired are related to customers that have good creditworthiness. Based on past experience, the management considered no impairment is necessary as there has not been a significant change in credit quality of these balances, which are still considered fully recoverable.

Allowance for expected credit loss of HK\$29,911,000 has been recognised for trade receivables as at 30 June 2021 (as at 31 December 2020: HK\$29,911,000).

In determining the recoverability of trade receivables, the Group considers any change in the credit quality of the customers from the date that credit was initially granted up to the end of each reporting period. The management also considers the forward-looking information and any change in the expected recovery of the trade receivables.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW AND OUTLOOK

Business Review

The Group is principally engaged in manufacturing and sale of networking products, specialising in the design and development of wireless networking products which are primarily targeted for home use and small scale commercial applications. The Group also manufactures and sells wired and wireless networking products such as Ethernet switches, LAN cards, Wi-Fi modules and Access Points as well as non-networking products, such as power banks and USB hubs. Its operations are mainly based in the PRC. Its main products are routers, which provide for wired and wireless transmission of data to devices while maintaining wired connection with modems.

The Group sold its branded products mainly on a wholesale basis through its distributors covering over many countries and regions including Korea, the PRC, Vietnam, Hong Kong, Taiwan and Malaysia, etc. In addition, the subsidiaries of the Group in Taiwan and Vietnam have strong sales team working closely with their distributors. The revenues contributed from the Group's Taiwan and Vietnam operations were approximately HK\$24.1 million and HK\$41.6 million respectively for the six months ended 30 June 2021, which in aggregate contributed approximately 20.5% of the Group's revenue.

Outlook

The Group's business objective is to strengthen the Group's position as a networking products manufacturer specialising in the design and development of wireless networking products by enhancing recognition of the Group's own brand and increasing the Group's profitability. In support of the Group's business objective, the Group will continue to implement the business strategies of promoting the Group's growth in the emerging markets in Asia and other markets with good potential, increasing the Group's production capacity and broadening its product offerings, enhancing the Group's overall competitiveness and market share.

The current business environment remains overshadowed by the United States and the PRC trade tensions with a possible trade truce and the recent COVID-19 pandemic in the world. The global COVID-19 pandemic constitutes an extraordinary event, a public health risk to all countries through international spread, and continue to require a coordinated international response. The speed of recovery and the extent of any long term impact remain uncertain but will depend on the duration and severity of the outbreak and associated containment measures. The Group is cautiously optimistic that the economic impact due to the COVID-19 pandemic will be mitigated as a result of anti-epidemic measures implemented by the various governments and the on-going vaccination schemes. Despite this, the Group will continue to pursue and maintain a conservative but proactive investment approach, focusing on product innovation, market share gain, geographical expansion and operational excellence, so as to bring better returns for the shareholders and ensure the Company stays competitive in the market.

Future Development

The Group is expected to release new products to the market in the third and fourth quarter of 2021. The new products will include improved versions of existing AC routers and new Wi-Fi 6 routers.

Our research and development team will keep delivering innovative technology for our customers.

Looking ahead, the Group will continue to build its existing business and look for new investment opportunities to enhance the Group's profitability and return to its shareholders.

The decrease was mainly due to the decrease of orders from the Group's customers located in Korea and other Asian countries during the six months ended 30 June 2021.
